

READINESS INSIGHT

Optimize Your Workforce

ALPHA Prime Solutions' Readiness Insight enables you to plan, build, manage and assess your organization's readiness within a single, comprehensive dashboard.

- ✓ Comprehensive view of readiness information across the organization
- ✓ Reduce time spent managing administrative tasks to maximize job productivity
- ✓ Align mission requirements with staffing capabilities
- ✓ Reduce personnel readiness deficiencies
- ✓ Provides workforce readiness framework and drives standardization across organizations and T/M/S aircraft

a division of ALPHA Facilities Solutions

Key Benefits

Increased Availability. A cloud hosted environment allows our clients to scale up or down depending on overall usage, user requirements, and the growth of the application. Our cloud hosted environment solution offers 99.99% availability.

System Flexibility. Assimilate existing paper records and recreate and transform processes into a formal system. Organize and improve existing business practices and standardize training information in one repository.

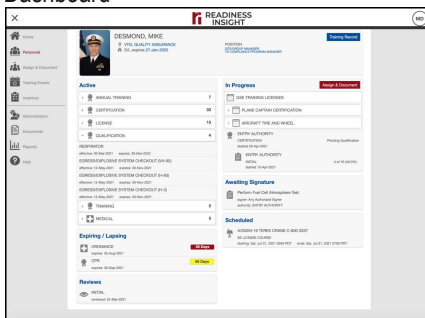

Qualification Data. Interactive dashboards and real-time analytics make it easy to track qualifications using role-based access and management. View organization-wide qualification levels down to the individual and update requirements as necessary.

Improved Efficiency. Take back time in your day and remove administrative delays of pushing paper. Aggregate multiple spreadsheets, datasets, and processes within the system and access detailed reporting under comprehensive dashboards.

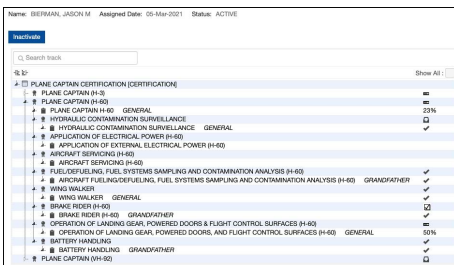

Product Features

Dashboard

- › Up to the minute status on the most critical information
- › Real-time notifications to users with actionable items
- › Automated workflows provide timely routing with minimal administrative burden
